

REAR DIFFUSER

(2005-2009 MUSTANG GT)

INSTALLATION INSTRUCTIONS

CONTENTS

- (1) Rear Diffuser
- (1) LH Upper Tape Bracket
- (1) RH Upper Tape Bracket
- (2) Lower Tape Brackets
- (2) Alcohol Pads
- (1) Adhesion promoter

TOOLS REQUIRED

- Detailer/Soap
- Microfiber Towel
- 11mm Socket & Ratchet

STEP 1

Clean the bumper using automotive soap and water. Wipe the areas circled above with the supplied alcohol pads.

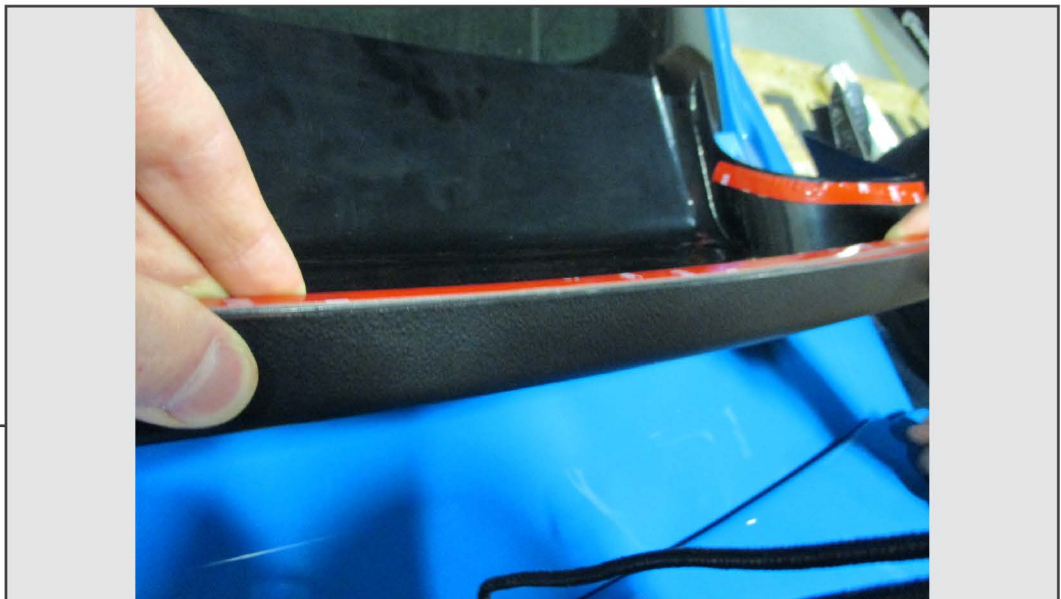

STEP 2

The tape brackets are side specific, the bracket shown is the LH side.

STEP 3

Clean all the areas of the diffuser where the tape bracket will adhere. First, use the supplied alcohol pads and let dry, followed by the adhesion promoter. Allow the adhesion promoter to dry.

STEP 4

Locate tape bracket so that just the thickness of the tape is stick beyond the edge of the diffuser. Lightly contact the tape bracket to the diffuser until you're happy with the placement, then press firmly to seat the adhesive.

STEP 5

Center the diffuser on the bumper and apply firm even pressure on all tape contact points. Adhere and apply pressure in the order shown above.

STEP 6

Mount the lower brackets by first removing the 11mm bolt, installing the brackets and then adhering it to the diffuser.
