

2015+ Roof Splitters

CONTENTS: 2 - Alcohol Wipes
2 - Adhesion Promoter
2 - Roof Splitters

TOOLS REQUIRED: Water & Soap
Clean Towel
Painter's Tape

Clean the roof area with soap and water to remove any dirt or debris. Then using the supplied alcohol pads, further clean the surface to ensure best adhesion results.

Test fit the roof splitter onto the roof. Measure 1" from the rear roof line forward, and 1" from the side roof line in. Mark the location of the roof splitter with painters tape. Do the same for the opposite side.

Peel back the 3m tape backing from the splitter, and apply the adhesion promoter to the tape. Allow time to dry.

Align the splitter with the marks made in Step 2. Install the roof splitter to the roof. Apply firm even pressure to tapped surfaced to ensure proper adhesion. Do the same for the opposite side. Installation is now complete.
