

LED Grille Running Lights - 6pcs 15-19 Mustang

Contents:

(2) Smoked LED Fender Lights
(2) Scotch Lock Connectors

Tools Required:

-Trim Panel Removal Tool

Step 1

Using a trim panel removal tool, remove the (8) plastic push clips securing the plastic radiator cover. Remove the cover. This will allow you to gain access to the side marker light.

Step 2

The lights will be installed on the lower (6) holes of the factory grille. Insert the wiring connector from the light into the honeycomb grille.

Step 3

Carefully pull the connectors out from the grille to plug into the each other. Then tuck the wiring and connectors behind the grille.

Step 4

Gently apply firm pressure to seat the light into the grille to secure.

Step 5

Locate the front side marker light connector and unplug from the light. Using (2) scotch lock connectors, splice the Red 12v + wire into the factory Purple w/White stripe wire. Then splice the Black 12v - wire into the Black wire.

Step 6

Test lights for proper function. Reinstall the plastic radiator cover using the factory plastic push clips. Installation is now complete.
