

TAIL LIGHT TRIM

(2010-2012 MUSTANG ALL)

INSTALLATION INSTRUCTIONS

CONTENTS

- (1) RH Tail Light Trim
- (1) LH Tail Light Trim
- (2) Alcohol Wipes

TOOLS REQUIRED

- Microfiber Towel
- Detailer/soap

STEP 1

Clean the tail light surfaces thoroughly with automotive soap and water. Using the supplied alcohol pads, wipe down the areas of the tail light where the doubled sided tape will contact.

STEP 2

Before removing the tape, test fit the tail light trim so you have a clear idea of how it should install. When you're ready for final installation, remove the backing from the double sided tape.

STEP 3

Place the tail light trim over the tail light, but do not fully press down. Once you are certain the trim is aligned properly and the reverse lights are centered in the openings, press down firmly on all areas to fully seat the adhesive.

STEP 4

Repeat Steps 1-3 for opposite side.
