

Consider these products to go with your new tank

Accusump™ oil accumulator

www.accusump.com

Add oil pressure before startup, and provide added protection against loss of oil pressure during acceleration, heavy cornering, and hard braking.

Available in 4 sizes and with several unique valve options designed to best fit your application.

Our EPC valving option provides controlled release and fast refill with the convenience of an electric valve

CM Filters

www.cmfilters.com

CM Filters feature a reusable machined aluminum filter body and a replaceable synthetic fiber filter element.

High Performance Fuel & Oil Filters

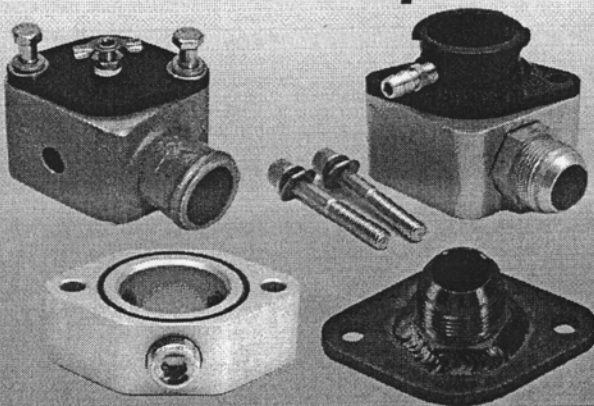

Their unique design offers high flow, fine filtration, easy filter inspection, and 10,000 miles between changes.
