

## INSTALLATION TECH-BULLETIN

### **WARNING, IMPORTANT INSTALLATION INFORMATION !!!!!!!**

The safety blow-off fitting must be torqued properly to 30 ft. lbs. to ensure a leak free seal. Also, if over tightened, damage to the burst disk is likely, resulting in the disk bursting during the filling process or potentially below its rated pressure.

**SAFETY BLOW-OFF FITTINGS MUST BE TORQUED TO  
30 FT. LBS.**
