Raxiom H13 LED Installation

Tools Required:
-Cutters
-Small Flat Head Screw Driver

Step 1//
Remove the white plastic retainer.

Step 2//
Locate the protruding tabs that are causing interference with the headlight housing.

Step 3//
Using cutters, cut the tabs flush with the outer ring.

While installing the retainer on the headlight housing, use a flat screw driver to rotate and lock the ring.

Then Re-install the LED Bulb.
