“Fixed” Side Window Louvers and Rear Window Louvers

- **Installation:**
 - Using a regular screwdriver, slide it between the window and the rubber gasket all around the window to break the seal.
 - Use soapy water to lubricate the rubber gasket.
 - Apply a light film of petroleum jelly to the louver flange on all sides.
 - Starting at the bottom corner, use a regular screwdriver to lift the rubber gasket and insert the louver flange beneath it.
 - Work your way around the louver, slipping the glange beneath the rubber.
Do the bottom last.
