

Lucas Oil Fuel Treatment Additive

Fitment: 79-14 All

Tools:

- ✓ Lucas Oil Additive
- ✓ Paper
- ✓ Pen

Installation:

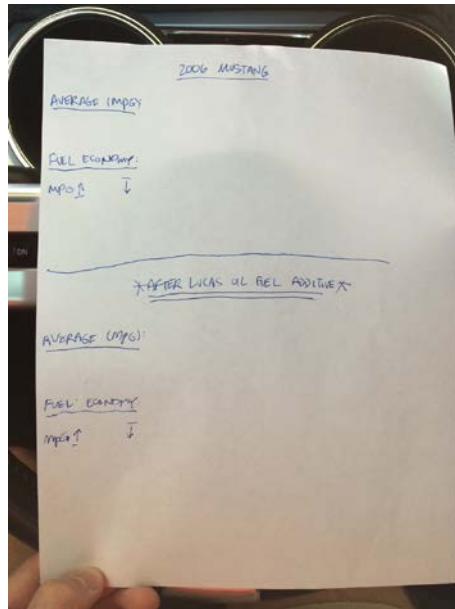

1. Gather necessary items need for installation

2. Check your fuel economy and mpg before adding Lucas Fuel Additive for comparison later

3. You can also opt to write the data down rather than compare pictures

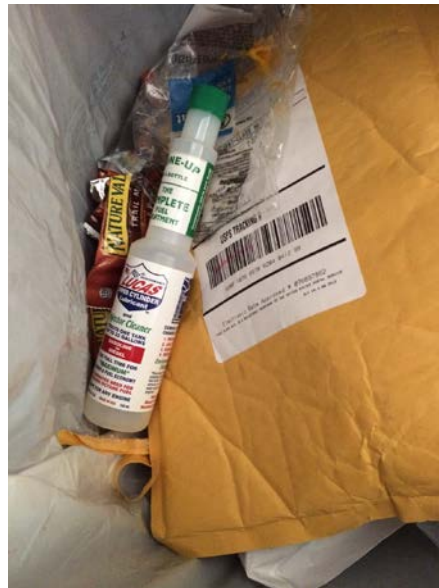

4. Once prior data is collected turn the off the car and get ready to add the Lucas Oil Additive

5. Open to fuel door and add the Lucas Oil Additive

6. After all the Lucas Oil Additive is added, properly dispose of the trash

7. After driving your car for a while, check you mpg and fuel economy to see if there is any change.

8. Once all is said and done, you should notice a small bump in fuel economy and in increase in mpg, and also lower exhaust emissions. If you use Lucas Oil Additive regularly, your fuel system should be cleaner and in turn will give you a better driving experience.
