

Door Sill Plate Screw Kit (79-93 All)

Time Needed: About 10 min

Tools Needed: Philips screwdriver

Removal Procedure:

Step 1: Using the Philips screwdriver back out the screws that hold down the sill plate by turning counter clockwise. There are 4 screws total.

Step 2: With all 4 screws backed out pull them from the sill plate.

Step 3: Repeat for both sides.

Installation Procedure:

Step 1: Open the new bag of sill plate screws and remove 4.

Step 2: Place the 4 screws into the sill plate holes.

Step 3: Using the screwdriver tighten all 4 screws.

Step 4: Repeat for both sides.

Step 5: You're finished!
