

Mustang Smoked Fog Light Covers (87-93 GT) - Installation Instructions

The below installation instructions work for the following products:

- **Mustang Smoked Fog Light Covers (87-93 GT)**

Please read through the instructions carefully before starting this project. Take the time to get all the materials together as well as all the safety equipment.

Installation Steps

1. CLEAN the light with mild soap and water or a window cleaner and dry thoroughly.
2. ALL of our fog light covers are a push on friction fit. Some of them will have a black rubber U-channel glued to the side back edges of the cover. Either way, just press evenly on the face of the cover so that it slides all the way back and is firmly adhering to the light.
3. REMOVAL: Generally the best way to remove the covers is to use a wooden tongue depressor. Please the end of the depressor at the back edge of the cover and gently pry it forward (while working around the edge) to release the cover.
