

### 1996-1998 FORD MUSTANG - 8CYL 4.6L, MAGNAPACK SYSTEM

DIAGRAM 2

**Warning:** When working on under or around any vehicle exercise caution. Please allow the vehicle's exhaust system to cool before removal, as exhaust system temperatures may cause severe burns. If working without a lift, always consult vehicle manual for correct lifting specifications. Always wear safety glasses and ensure safe work area. Serious injury or death could occur if safety measures are not followed.

**Step 4:** Set the final position by checking for ground clearance, frame clearance in all areas, and rear fascia clearance of exhaust tips. Once a final position is chosen, tighten all hardware including H-pipe hardware, all U-clamps, exhaust tip clamps, and exhaust tip slide hangers. Inspect all hardware after 25-50 miles of operation, and re-tighten if necessary.
